Global Airfield Services

HL GULF, LLC

HL Gulf (formerly Hi-Lite Group, Hi-Lite Global Gulf) has been servicing airports and military installations in the MENA region since 2010. In 2010, HL Gulf expanded its international market portfolio by signing a contract at the New Doha International Airport in Doha, Qatar. This project opened up HL Gulf to the entire Middle East market resulting in further work in the region in the U.E.A., Oman and Saudi Arabia.

The main objective of every project is to enhance airfield safety, minimize runway incursions and excursions, ensuring its part in putting "safety first around the world". HL Gulf leads globally in airfield services, offering a variety of packages tailored to help airports improve their operations, aesthetics, compliance, and maintain & become leading airports. Our services have reached areas in the Middle East such as the Kingdom of Saudia Arabia, United Arab Emirates, Qatar, Oman, Egypt, and Sudan. We have regional offices in the UAE & the Kingdom of Saudi Arabia.

HL Gulf prides itself on quality & compliance, serving and providing airports with long term solutions to managing airfields to help rectify problems and increase returns on assets. HL Gulf is able to serve airports with professional staff and equipment stationed globally with the skill set to quickly cater to various airports. HL Gulf has been serving airports for over 30 years making HL Gulf a global leader in airfields maintenance.

Through multi-year commitment HL Gulf delivers the following solutions:

- FAA Part 139
- ICAO Annex 14 Inspection & Compliance
- Spec-Rite Online, Markings Management Platform
- Skip-Line Technology
- Safety & Compliance According to ICAO
- Operations Management & Consulting
- Pavement Management & Engineering Services
- Staffing & Personnel
- Specialized Equipment & Assets
- 24/7 Around the Clock Support

Total Management Solutions

AIRFIELD MARKINGS

Pavement Markings are a critical safety tool and guidance system on every airfield. HL Gulf takes special pride in our runway, taxiway, and apron markings by setting the highest standards worldwide.

RUNWAY RUBBER REMOVAL & SKID RESISTANCE TESTING

Our inspection and testing provide precision in removing runway rubber build-up and other contaminants. Our proprietary methods have been proven to speed up the removal process, without damaging markings, making it ideal to minimize runway downtime.

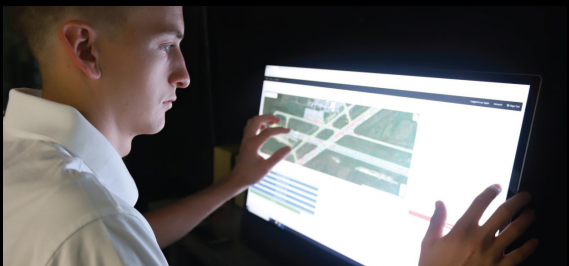

PAVEMENT MAINTENANCE

HL Gulf's new partnership with Skidabrad Group, LLC allow the company to expand their services to include pavement texturing for runways in the Middle East. The new partnership enables HL Gulf to expand on their current services to include texturing for roads, bridges, and runways while improving safety.

AIRFIELD MANAGEMENT

Our years of experience with airfield works have positioned HL Gulf to offer complete contracting and consulting solutions designed to service airports of all sizes, globally. HL Gulf programs are designed to consolidate and combine all services under a single provider.

SPEC-RITE ONLINE

Spec-Rite Online is a management platform focused on providing intuitive tools for assessing the quality of airfield and highway markings.

SKIP-LINE TECHNOLOGY

For over 50 years Skip-Line has manufactured Skip-Time controllers for use in North America and global markets. Skip-Line provides the world with the tools to create safer and smarter roadways through connected equipment, automation, and data visualization.
